Physics

<< My scientific research activity of over 30 years was carried out in quite a large number of universities and research institutions: Universities of Birmingham, Bath and Southampton, UK, University of Rome “Tor Vergata”, Italy, Nanoelectronics Research Institute (former Electrotechnical Laboratory) of AIST Tsukuba, Japan, and the National Institute of Materials Physics (former Institute of Physics and Technology of Materials), Bucharest. I had collaborators and co-authors of my papers scientists from many countries, on four continents, so interaction with people of various origins, cultures and beliefs comes natural. I also love to travel, sample various cultures (and cuisines) and befriend different people.

Also, having to adapt to various hosts’ research projects, I take multidisciplinary as a very important issue in today’s research; we all have something to learn from each other.

As for mentoring young students of various origins and backgrounds, it is worth noting that, during my 8+ years spent at University of Birmingham, I supervised successfully three PhD students, from China, Malaysia and Vietnam. >>

<< Cristian Mihail Teodorescu (160 papers, about 3000 citations, Hirsch index 31) leads the Laboratory of Surfaces and Interfaces (22 people) from the National Institute of Materials Physics. The research activities are focused on atomically clean surfaces and well-defined interfaces, with a wealth of in situ structural, compositional, chemical, electric and magnetic characterizations: angle- and spin-resolved photoelectron spectroscopy, electron diffraction, scanning tunneling microscopy with atomic resolution, adsorption and desorption dynamics, band bending at interfaces, etc. These methods are implemented in several setups, all operating in ultrahigh vacuum: two complex clusters with photoelectron spectroscopy (including spin-resolved PES), molecular beam epitaxy and scanning tunneling microscopy, one X-ray photoelectron spectroscopy setup coupled to a high temperature / high pressure reaction cell, low energy electron and photoelectron microscopy (LEEM-PEEM), positron annihilation-induced Auger electron spectroscopy. During the last years, the group has obtained novel results at international level on chemistry and photochemistry at ferroelectric surfaces, graphene-based structures on ferroelectric surfaces, multiferroic structures, several epitaxial heterostructures, fundamental aspects of ferroic systems. The group publishes routinely in ISI ranked journals with high impact factor (5 to 12).>>

Communication Studies

<< My teaching and research interests follow three main lines: media economics, cultural industries and regulation and self-regulation. I approach these fields from the point of view of neo-institutionalism and sociology of culture (including the sociology of journalism), trying to understand how institutions evolve, grow, and disappear and how values, norms and rules are negotiated and validated by social actors, in a never-ending fight for access and control of material and symbolic resources. My academic career was shaped by my wonderful professors, that are now my colleagues, by the extraordinary international teams I was part of, for projects related to the evolution of journalism in Europe and beyond, and by my visiting fellowships at the Aarhus School of Business, Denmark, Universita della Svizzera Italiana, Switzerland, European University Institute, Italy, and Center for Advanced Internet Studies, Germany. I started as a qualitative researcher, but recently I got more and more interested in quantitative methods, in part due to my participation in Digital News Report, the largest, multiannual international research on news consumption, in part due to the increased availability to big data, that allow us to understand better the social world we live in. Any research themes in these areas are more than welcome. .>>

Sociology

<< I have a constant scientific curiosity for the social and cultural constructions of “the other/otherness” and a belief in the need for a critical, reflexive and public sociology, one that takes into consideration its limitations, omissions, marginalizations, invisibilities and addresses both academic communities and wider public. I am more attracted by the unpaved roads, those created at the intersections of various disciplines. Especially interested in the present-day critics of androcentrism and anthropocentrism of social sciences, I have a keen interest in the work of defamiliarizing the familiar in/of social life. From these perspectives, my researches are targeting certain large sociological domains that unequivocally require interdisciplinary approaches such as: Gender Studies, Sociology of Everyday Life, Sociology of Things, Sociology of Culture, Surveillance Studies. Inside these theoretical frames I would like to work with my Ph.D. students. >>

Political Science

<< Dragos Paul Aligica's work is interdisciplinary and falls into several classes, united by an underlying interest in institutional theory, comparative governance systems, and administrative science, seen as an expression of humans' practical rationality dealing with the future, the possible and the feasible in social organization. Aligica had made contributions to the school of public choice and institutional theory developed by the Economics Nobel Prize winner Elinor Ostrom and her collaborator, the co-founder of the public choice school, Vincent Ostrom. In this respect he published extensively on theories of governance, polycentric systems, the "neither markets nor states" domain, public entrepreneurship, civics in governance systems and institutional design.

In addition to that, Aligica's work has also been engaged into various analytical, normative and historical explorations at the interface between business, society and government; with a special interest in the history and evolution of ideas about capitalism, socialism and alternative economic and governance systems. >>

<< Radu Carp is Professor at the Faculty of Political Science, University of Bucharest, Director of the Department of International Relations, Security Studies and Public Policies. After graduating an MA in European studies and international relations at IEHEI Nice in 1996, he turned back to Romania, starting to teach at the University of Bucharest in the same year. He has received the title of *Scientia Juridica Doctor* in Public Law, University Babeş - Bolyai of Cluj in 2002. Member of the Doctoral School of Political Science since 2011 and of the ISDS - UB since 2019, Professor Radu Carp is interested in topics related to: the European model of the national minorities protection in Romania and neighbouring countries; the autonomy of religions and the Church - State model in a comparative perspective; multilevel governance in the European context; populism and digital parties. Having degrees in Law, Philosophy and International Relations, Radu Carp is naturally dedicated to the interdisciplinary research in all his writings so far. Since 2020, he is a founding member of the Romanian Center for Russian Studies, a research center part of the University of Bucharest and is currently involved in a UEFISCDI/EEA grant that is run by this Center together with Fridtjof Nansen Institute from Norway. Professor Carp is member of the Executive Committee and of the Academic Curriculum Group of the E.MA - European Master's Degree in Human Rights and Democratization, Venice, he is part of the research project *Ethics and Politics in the European Context* coordinated by the Catholic University of Lublin and member of the research network *Observatory on Local Autonomy* coordinated by the Université de Lille. He has a wide experience in teaching in different universities in Europe, Canada, USA, Argentina and Taiwan. Radu Carp regularly teach at the Cultural Diplomacy Institute in Berlin and at the Global Campus of Human Rights in Venice. Having Hirsch Index 11, he published 24 books as author and co-author (in Germany, Romania, the Netherlands, Slovakia), 90 book chapters and 100 scientific articles in Austria, Belgium, Bulgaria, Germany, Hungary, Lithuania, Poland, Republic of Moldova, the Netherlands, Ukraine, USA. His latest book, published in December 2022, is written with an Ukrainian researcher, Marianna Prysiashniuk (who is now part of the University of Bucharest, in the framework of the programme *Reconceptualising Exile - Ukrainian Scholars and Students at Risk*) and is entitled *War in Europe. Cultural Studies

<< The Medieval Church History that inspires my research also informs my teaching commitments covering Byzantine History, the Middle Ages in the South-Eastern Europe and the Mediterranean, Theological Controversies between Latin and Byzantine Churches. After serving as a Tutor and Assistant Professor at the University of Bucharest (2002-2008), I have been promoted to full-time teaching as a Lecturer in 2008 (Department of Orthodox Theology). Starting October 2018 I am serving as Academic Dean and Professor for Church History at St Vladimir's Orthodox Theological Seminary (New York). In terms of methodology, I follow an interdisciplinary philosophy by combining concepts and examples drawn from several disciplines (e.g. History, Theology, Classical Studies, Social Anthropology, and Cultural Studies). The laboratory in which new research ideas are forged and, in the same time, converted into something meaningful for students is the classroom. My students have the opportunity to take charge and engage with the primary sources and secondary literature, and to enhance their visual understanding of the abstract historical topics under discussion. >>

Philology

<< Alexandru Nicolae is first and foremost interested in language variation and change, specifically in the morphosyntactic structure and development of Romanian from a comparative and diachronic Romance and Balkan perspective. Trained in theoretical generative linguistics, in later years he has developed an interest for the interface between language and cognition, working in the larger framework of 'biolinguistics'.

History

<< My main fields of academic interest are economic and social history, with special focuses on the comparative long-term development of European peripheries, the role of natural resources, institutions and human capital, as well as historiography and research methodology. The experience accumulated in education management has sharpened my interest in the history and current functioning of institutions of higher education, as well as in the specificities of human capital accumulation. More information about my current research project can be found at <https://ahe-ro.unibuc.ro/>.

I strongly believe that interdisciplinarity is the main avenue for enhancing knowledge, and history can contribute significantly to the integrated development of the social sciences and humanities. Therefore, I am a founding member of 2 Interdisciplinary Research Training Groups inside ISDS-UB, and focus now on stimulating doctoral students to undertake cutting edge research in these directions. >>

History

<< I worked in the research field of the archaeology, archaeozoology, archaeomalacology and paleoecology research, but also in related topics like food strategies of the prehistoric communities based on water resources, paleoeconomy of the human communities, as well as paleoenvironmental and paleoclimatic reconstructions along with paleoecological and zoogeographical studies for different historical periods.

My scientific interest is the reconstruction of the past through multidisciplinary approaches using scientific tools from different fields like archaeology, biology, biochemistry, physical anthropology, physics, experimental archaeology >>

Catholic Theology

<< Prof. dr. Michael Fieger (born in 1959 in Bucharest) teaches Old Testament and Hebrew at the Faculty of Theology in Chur (Switzerland) and is specialised in Old Testament exegesis, biblical Hebrew and Coptic, as well as in the Gospel of Thomas. He has published greatly on these subjects and has recently acted as co-editor of the German edition of the Vulgate and of the online `Vulgata in Dialogue` journal.

Potential areas of inter-disciplinary research for Ph.D. researchers are Old Testament theology and philology, as well as the new academic management in the field of theology. >>
